PROJECTS

- 1. Web Development**
Skills : HTML, CSS, JavaScript
 - In this I worked as a frontend developer. I created calculator Page, tribute page, todo list using HTML, CSS, JavaScript
- 2. Data Analytics**
Unemployment rate during covid-19 USING TABLEAU
skills : Tableau, SQL, HTML, Python basis
 - In this we create the dashboards, and then to analyze the data we can create graphs of different types at last we create data visualization, story and report .
- 3. Hospital Database Management System**
skills : SQL
 - This web-based system allows you to control how a hospital is run.
 - It establishes a uniform record of clients, physicians, and a rooms that is only accessible to the administrator.
In the database every doctor and patient will get a unique ID.
